Subject: Re: Public information on arsenic

What I want to share with our village is, what is arsenic and where it comes from. I was told arsenic is present in most wells but at lower concentrations. I maybe wrong. Material provided brings out the various diseases at high levels and in time resulting in death. This information is being pasted onto our village people by our political adversaries. It would be most helpful to provide information based on our levels of arsenic. We are allowed use of our water wells with arsenic but it must be safe to drink otherwise we would stop the use now. It would also be helpful for a power point on the HAMP project reflecting how the water wells in the Hardrock will be distributed to our village. The questions is always, how much will it cost. Our village water system is not metered so the monthly water rates were increased from \$15.00 a month to \$25.00 resulting in public outcry that almost had me run out of the village. The project will have to be done locally. I have not seen or have copies of the most recent drawings by IHS engineers.

Bruce,

I think you are right I was reviewing the presentation and it is a little more technical in nature than I remember.

I use several arsenic slide sets, and don't recall which one I used at Hopi. But in any case, if this would be used for general public awareness, I could put together something that might be easier to read and understand. What I use for talks is mostly to support the talk, not to be stand-alone material. It would be better to do a new set that didn't assume readers had a professional knowledge and background.

Thanks Lionel. Give to Velleda. We can review and update.

Ivan,

I have the PowerPoint that Bruce gave a couple of years ago if you would like that.

Subject: Public information on arsenic

Good Morning Bruce. TGIF. For starters, can you send me pamphlets, CD's power point, etc., what you may already have available. To develop based on our arsenic levels will take time. I am ready to purchase a flat screen TV to have public information played in our lobby. Thank you for any assistance.
